The next generation **of power**

Life in the fast lane just got a major upgrade.

For generations, the Golf GTI and Golf R have been the epitome of power and performance. The eighth generation of these models are no different.

Can you handle the power?

Perfectly complemented by precision and German engineering, the GTI and R make for the most powerful versions of Golf ever.

With their 2.0-litre TSI engines, these performance hatchbacks each deliver impressive 180kW and 235kW power respectively. With these, you're propelled from 0 to 100 km/h in just 6.4 seconds for the GTI and 4.8 seconds for the R. The optional black performance package on Golf R offers even more performance, increasing its top speed from 250 km/h to 270 km/h.

This level of power guarantees the ride of your life on straights and just begs to be put to use on winding routes. Here, you'll also receive a helping hand from the differential lock systems, which stabilise the Golf GTI and R, keeping you in control of your drive. Power on Golf R is distributed with variable control to all 4 wheels thanks to the 4MOTION all-wheel drive system.

As a first for Golf R, the intuitive R-Performance torque vectoring system on the rear axle has been introduced. This system distributes power between the rear wheels to enhance the cornering characteristics of the car.

For even more fun in the Golf R, select "Drift Mode", which is available on the optional black performance package, to discover that there's no limit to its power. The new Golf GTI and R also come with the DSG® dual clutch gearbox with shift-by-wire capability. This electronic system lets you effortlessly shift through gears allowing for optimal vehicle performance.

GTI and R genes meet **cutting-edge design**

The eighth generation of GTI and the R model of this icon are still distinctly Golf, but with sleek new updates and technology to keep them firmly future-forward.

The GTI and R combine the best of the past with advanced design principles to create a new signature look. The Golf GTI features a distinctive red line that stretches across the front with a honeycomb design front bumper and black air intakes highlighting the radiator grille. The Golf R features a distinctive blue line across the radiator grille, R-style air intakes, the striking R logo as well as a brand-new front bumper with a distinctive front spoiler.

Slim LED matrix headlights with IQ.LIGHT use 22 individual LEDs in each light to illuminate the road ahead, helping you avoid hazardous situations. If you choose the Matrix LED package, you'll have a sliding turn indicator for extra flair.

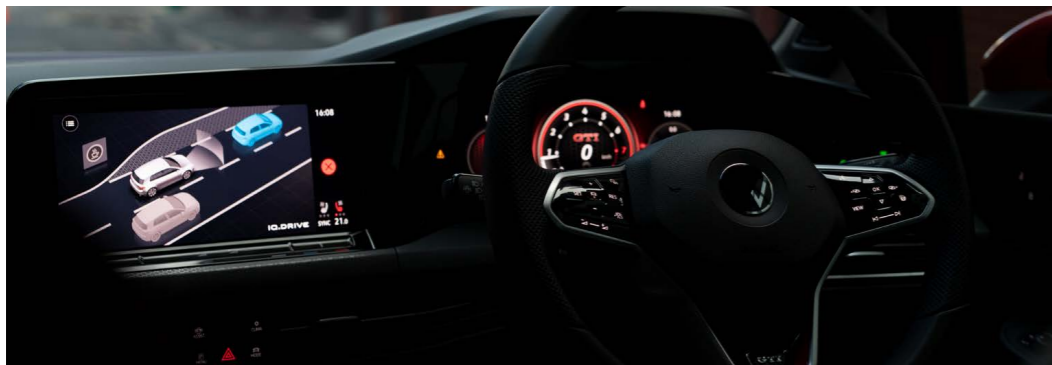

At the back, the roof spoiler and chrome-plated twin pipes are distinctively GTI. The R model includes a brand-new rear bumper which features an impressive chrome-plated quad pipe exhaust system as standard with the option to select the performance Akrapovich exhaust system. The black performance package on the R includes a motorsport-style rear spoiler which further highlights the performance nature of the model. LED tail light clusters also round off their unique appearance, making the GTI and R more striking than their predecessors.

The power to connect

Every element of the Golf GTI and R have been engineered to let the driver intuitively connect with the latest technology Volkswagen has to offer.

The 10-inch Digital Cockpit Pro allows you to configure the display to suit your individual style and interests. On the R, the Digital Cockpit Pro brings together all sporty displays and controls into one special R-View tailored specifically for the model. The classic function knobs have made way for the Innovision Cockpit with a 10.25-inch touch-sensitive screen that boasts gesture control capability and lets you manage everything from music to the Climatronic air-conditioning with touch and swipe actions. Swipe to open the sunroof and flick through 30 different ambient lighting colours as you sit back in your sporty “Vienna” leather seats in the GTI and the premium sports “Nappa” leather seats in the R to revel in the freedom inspired by Golf.

The multifunction leather steering wheel's capacitive buttons obey your every command with a simple tap of the finger. Thanks to the blue-lit “R” button on the Golf R’s multifunction steering wheel, “Race” mode is always just a touch away. Taking things to the next level is the Harman Kardon sound system with a 12-channel amplifier and 480W output from eight speakers, one centre speaker and a subwoofer. Couple these with gesture control of the volume and you end up with a GTI or R poised to deliver the ultimate sound experience.

Tech meets torque

Even before you get in, the keyless entry system makes it clear that the new Golf is power and intelligence fused into one.

Once you're on the road, you'll benefit from IQ.DRIVE to make your drive safer and more intuitive. Features like Travel Assist use Adaptive Cruise Control and Lane Assist for a more relaxed journey. The rear view camera and Park Assist features make pulling into a tight spot easier than ever. The GTI and R offer additional intuitive technology such as Blind Spot Monitor with Rear Traffic Alert and exit warning system. The GTI and R also come standard with Adaptive Chassis Control which optimizes the vehicle handling to give you the ultimate driving experience.

You'll also be able to pair up your phone through We Connect Go, putting all the most important vehicle information at your fingertips. Your personal car companion - We Connect Go can log your journey, monitor your fuel, analyse your driving style, locate parking spaces and even schedule your next service appointment.

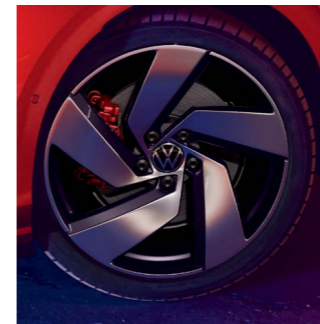

Be sure to download the app* and have everything you need in the palm of your hands.

*We Connect Go is compatible with Android and iOS devices.
