Family first

Both light on fuel and generous on legroom, the new Polo Sedan is the perfect fusion of fresh design and faceted functionality. Engineered with your family in mind, the new Polo Sedan is fully equipped to tackle whatever road lies ahead.

Feel at home

From bumper to bumper, the new Polo Sedan is designed to make you feel at home. With body-coloured exterior mirror housings and door handles, the Polo Sedan has all of the aesthetic adornments of a Volkswagen vehicle. Reliable and sensible, the Polo Sedan uses ECO LED headlamps and LED taillights to ensure safer driving at night. While maintaining a sense of familiarity, the new bumper and grille design that stretches across the front elevates its classic design.

A car that **gets it**

The new Polo Sedan will change the way you drive. Fully equipped with a 1.6-litre MPI engine that delivers 81kW of power that improves traction and stability, you are always in control. Steering you in the right direction, the Polo Sedan is always thinking ahead. Its multifunction dashboard display comes standard with wireless App-Connect, wireless charging and the new 10-inch MIB Regio Radio infotainment system. With advanced graphics and design, the MIB Regio Radio creates a unique user experience with customizable user profiles, secured using a 4-digit PIN.

Smart means safe

The new Polo Sedan is synonymous with safety, sensibility and style. Ready for the road ahead, the Polo Sedan utilises intuitive smart systems to keep you secure whether you're driving or parked. With the Rear View camera system improving visibility when reversing, Park Distance Control measuring obstructions surrounding your vehicle and Hill Start Assist preventing rolling when inclined, the Polo Sedan is always looking out for you.

A breath of fresh air

Make road trips memorable with the Polo Sedan. This family-friendly four-door has a boot capacity of 521 litres, a length of 4.56 metres and a 2.65m wheelbase. With cooled glove compartments, storage pockets in the rear of the front seats, and cup holders for your convenience, the Polo Sedan gives you enough room to enjoy the journey.

Arrive feeling refreshed with the Climatronic touch air conditioning system and enhanced air filter. Regulating airflow and removing dust and pollen, the Polo Sedan allows you to enjoy the journey in comfort.
