# It's the Taigo

## Volkswagen's expressive SUV.

The Taigo is dedicated to all drivers who, like you, follow their own path, wish to affirm their style, move forward instead of follow and make the ordinary even more extraordinary every day.

Designed with the contemporary driver in mind, the Taigo has a petrol engine and 7-speed DSG transmission. The SUV is available with a 1.0 TSI 85kW engine across three models. Its Start-Stop with regenerative braking, low-emission

TSI engine, and Eco Function\* steer Volkswagen's journey towards eco-friendly cars. Taigo is the ultimate cross between style and practicality. Now available in Life, Style or R-Line models. Let's go – in the Taigo!

\*Standard with the R-Line model  
Volkswagen's expressive SUV.

# Design with **distinction**

**Outstanding character and dynamism – anyway you look at it.**

As an SUV with a coupé-like shape, Taigo ticks all the boxes, and none, simultaneously. A side view of the Taigo is characterised by defining lines guiding the eye seamlessly from front to rear exterior. The stylish honeycomb grille connects the matrix LED headlights framing the front of the car and its expansive width. Light strips at both the front and rear exterior make it almost impossible to ignore its design-orientated appearance. The logo projection lighting epitomises the car's modern expression giving it its Volkswagen personality.

The Taigo takes your day-to-day a step further with a panoramic sunroof\* that invites your surroundings inside. With the choice of having the sunroof tilt up or slide open fully, you can personalise your natural lighting and air inflow. The car's presence on the road is further strengthened by roof rails spanning the length of the roof offering sports enthusiasts the convenience they're looking for. With a spacious boot of 440 litres and rear seats that can fold 60:40, the Taigo allows for maximum storage with the seats up or down.

\*Optional with all models

# An interior to **move you forward**

**Every drive is a revelation in the Taigo.**

Style meets functionality with the Taigo's interior. Standard features include a soft-touch dashboard, leather multi-function steering wheel, digital cockpit, and ambient lighting. App-Connect and We Connect Go keep you connected when you're on the move, so you always know where you are and where you're going. Adding to its practical edge, are the Taigo's Voice Control, Navigation System, Wireless phone charging, and keyless entry – all of which are optional on all models. The digital Infotainment system with a 6.5-inch radio display on the Life model and an 8-inch radio display on the Style and R-Line models, and Beats® sound system\* round off your customisable driving experience.

\*Optional with Style and R-Line models

# IQ.Drive and safety

**Taigo's got your back while you venture forward.**

IQ.Drive's intuitive technology\* includes features like Adaptive Cruise Control (ACC). ACC can maintain a set distance from the vehicle in front by automatically braking and starting up again when sitting in traffic, making it a driver's best friend. Working in conjunction with Lane Assist, Travel Assist uses its predictive cruise control to keep you at a safe speed, and following distance no matter bends or roundabouts.

\*Optional with Style and R-Line models

Safe driving is also enhanced by Autonomous Emergency Braking, Front Assist, Side Assist and Fatigue Detection. Park Assist is available for that final stage of the drive, by measuring whether a parking space is big enough and then steering you into it.

# Wheels & Rims

**16" Belmopan Alloy**  
(Standard on Life)

**16" Everett Alloy**  
(Optional on Life)
