Switches the way you do

Thoughtfully reimagined for today's travelling needs, the all-new Caravelle eHybrid has shifted expectations up a gear. Part electric for the daily commute and part petrol for the open road, this versatile seven-seater is the perfect package of effortless, enjoyable luxury.

Packed with innovations to adapt to the unexpected, it surrounds both driver and passengers in first-class comfort and safety. From busy morning routines to spontaneous weekend escapes, this icon has been redefined to set a new benchmark for space, comfort, and style.

Designed around your life

Measuring in at 4.973m in length and 1.907m tall, the Caravelle eHybrid's bold, modern design accommodates seven passengers with ease. This flexible modular layout means rear seats slide, recline and remove to create up to 1,844 litres of cargo space. Up front, the IQ.Light LED matrix headlights actively steer light into corners before you even turn, selectively dimming individual beams to prevent dazzling oncoming traffic.

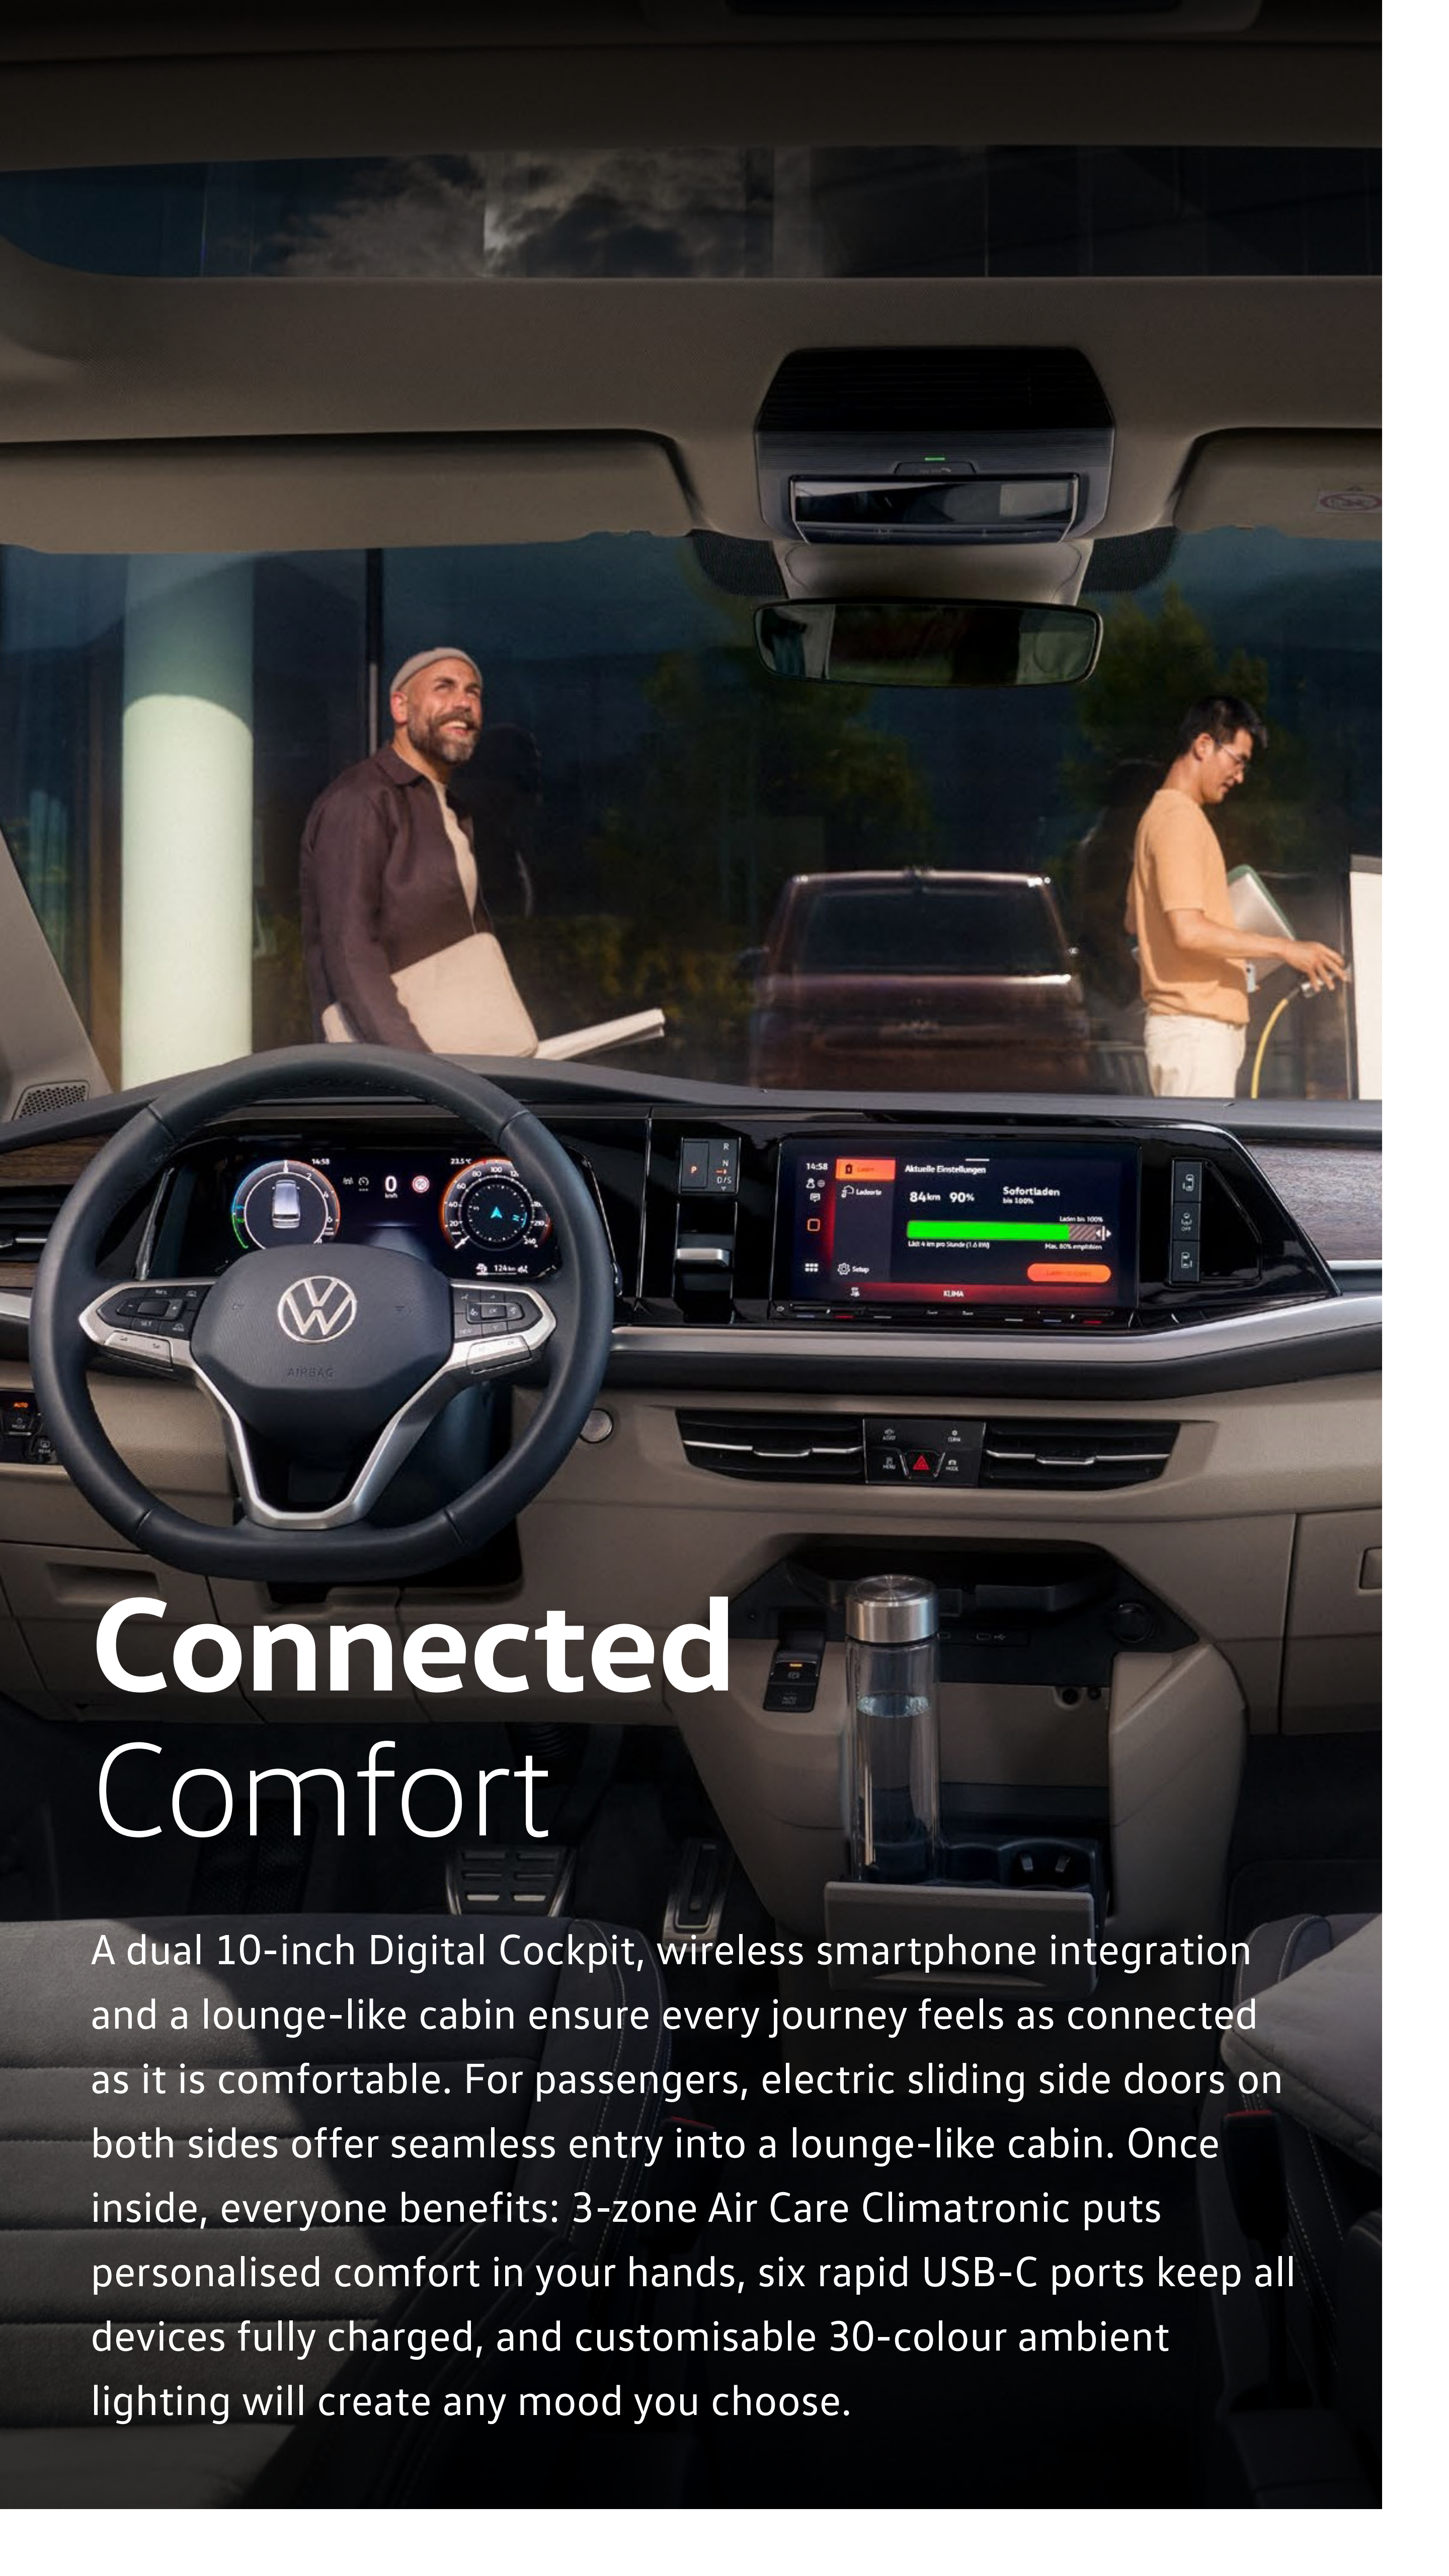

The first plug-in hybrid for VW

Electric for going around town. Petrol for the highways. The Caravelle eHybrid blends the best of both worlds without compromise. The innovative 19.7 kWh battery allows you to complete daily commutes without using a single drop of petrol.

When adventure calls, dual electric motors pair with a turbocharged engine to deliver 180 kW of 4MOTION all-wheel-drive capability. Four selectable driving modes—Eco, Comfort, Sport and Individual—ensure complete confidence on every road.

Connected Comfort

A dual 10-inch Digital Cockpit, wireless smartphone integration and a lounge-like cabin ensure every journey feels as connected as it is comfortable. For passengers, electric sliding side doors on both sides offer seamless entry into a lounge-like cabin. Once inside, everyone benefits: 3-zone Air Care Climatronic puts personalised comfort in your hands, six rapid USB-C ports keep all devices fully charged, and customisable 30-colour ambient lighting will create any mood you choose.

Tuned in for entertainment

With Radio "Ready 2 Discover" infotainment systems and App-Connect, road trips come loaded with an unforgettable soundtrack.

The optional 13-Speakers, 840-watt Harman Kardon sound system takes everything up a notch by wrapping the entire cabin with acoustic clarity, turning every seat into the best seat in the house.

Assurance on the road

The Caravelle eHybrid comes equipped with VW's latest IQ.DRIVE technology. The vehicle offers semi-automated assistance that works behind the scenes to make any drive safer and simpler.

Features like Travel Assist and Adaptive Cruise Control seamlessly manage your speed and lane positioning, while Front Assist and Emergency Assist can actively help avoid potential collisions. This advanced suite of safety technology works in the background so you can embrace the joy of driving.

Wheels & Rims

The Caravelle eHybrid comes standard with 17-inch Dundrod alloy wheels, featuring a striking black, diamond-turned finish. For your peace of mind, the Tyre Pressure Monitoring System makes every drive smoother and safer.
