# Nothing but **Aura**

You loved it from the Mark1, and since then, you couldn't get enough. Now, the new Golf is finally here. Be a part of our #ForeverGolf legacy and experience the 1.4 model that gives you more reasons to fall for it, just like you always have.

# Designed **to Drive**

The new Golf features a refreshed, bold exterior with new headlights and taillight clusters, complementing the new bumper and tailgate design for a sporty, dynamic look. The design continues inside with a focus on comfort, offering customizable seating options in fabric, ArtVelours, or Vienna Leather. Take your pick.

# Tailored Technology

Inside, the 10" digital cockpit provides a customizable, high-resolution display, while the MIB 4 Infotainment System with a 10.3" radio ensures easy access to music, navigation, and more.

The 10-colour ambient lighting on the dashboard (Life) or 30-colour ambient lighting on the dashboard and doors (R-Line) lets you set the atmosphere you like for every journey.

2 x USB type C data sockets and 2 x USB charging sockets are visible in the rear with a charging capacity of up to 45 W.

# Fine Tuned **Audio Features**

In the new Golf, every drive is a concert on wheels. Experience an unparalleled audio journey with the Harman Kardon Sound System. Boasting 8+1 speakers and an impressive 480 watts of total power output, this system delivers crystal-clear sound and deep, rich bass. The 12-channel digital amplifier ensures precise sound distribution, while the internal subwoofer brings the full spectrum of music (or those hands-free calls) to life.

# Drive Intelligently

The new Golf's IQ.Drive suite takes safety and assistance to the next level, with a comprehensive range of features designed to give you peace of mind. The IQ.Drive Assist includes a multifunctional camera, Adaptive Cruise Control, Autonomous Emergency Braking (Front Assist), and Lane Assist to help keep you on track and reduce the risk of accidents.

The Emergency Assist and Proactive Passenger Protection System enhance safety in critical situations, while the Side Assist Lane Change System offers an additional layer of confidence. Alerts are displayed conveniently on the 10" Digital Cockpit Pro, ensuring you're always informed and in control.
