## Disclaimer

1. Dimensions, capacities and abilities apply to standard vehicles.
2. Actual consumption will vary with vehicle loading, driving style, climatic and road conditions.
3. This information was effective as at 01 August 2019 valid for model year 20 and is subject to change without notice.

All diesel vehicles require low sulphur grade diesel of 50 ppm or lower.

### \*Fuel Consumption and Carbon Dioxide Emission Figures

Fuel consumption and CO<sub>2</sub> emissions values were obtained in accordance with the prescribed uniform measuring standard (SANS 20101: 2006 / ECE R101: 2005 in its currently applicable version). The verified values do not apply to a specific vehicle and do not constitute part of the product offer. They are provided solely for the purposes of comparison between different vehicle models. Because of the need to maintain strict comparability of results achieved by the standard tests, they cannot be fully representative of real-life driving conditions. Variations in driving styles and in road, vehicle and ambient conditions, will have a bearing on the results achieved on the road. For these reasons consumption achieved on the road will not necessarily accord with these verified values. Based on lightest variable (no options) and 90% tank filling. Weight may vary depending on options fitted to vehicle. All measurements listed are based on series vehicles. Because of manufacturing tolerances/tyre sizes/type of chassis, the actual dimensions may differ slightly from the values stated here. The information about the degree of slope angle front and rear as well as the ramp angle each refer to the loaded condition of the vehicle in consideration of the gross vehicle weight.
