Disclaimer

1. Dimensions, capacities and abilities apply to standard vehicles.
2. Actual consumption will vary with vehicle loading, driving style, climatic and road conditions.
3. This information was effective as at 01 June 2020 valid for model year 20 and is subject to change without notice.

Vehicle Tare mass given at 90% tank filling without driver (75kg). Selected optional extras increase the unloaded weight of the vehicle.

*Fuel Consumption and Carbon Dioxide Emission Figures

The figures reflected were obtained in accordance with prescribed uniform measuring standards (SANS 20101: 2006 / ECE R101: 2005 in their currently applicable versions) under laboratory type conditions. The measuring standards are stipulated by law. They do not apply to a specific vehicle and are provided to enable comparison between different vehicle models tested using the same uniform measuring standard. The values are accordingly not necessarily representative of real-life driving conditions. Factors such as driving style, vehicle load, road conditions, tyre size, traffic and ambient conditions may result in different fuel consumption and carbon dioxide emission levels to those achieved under the test parameters referred to above. More details are contained in the owner's manual.

The most popular in its class

State-of-the-art infotainment systems

New radios and functions with intuitive control.

Low loading sill height

For easier loading and offloading.

Design

Sharper lines, stylish front and distinctive tail-end.

Maximum functionality and flexibility

Wide sliding doors, and folding, double-folding and removable rear seats.

Low fuel consumption

An average of 5.7–6.3 l/100km*.

Optimised suspension tuning

Improved suspension and damping for an even more enjoyable ride.

Driver assistance systems

Including optional Park Distance Control with a rear-view camera.

High standards in matters of safety

Multi-Collision Braking (MCB) System as standard.

Unique drive concept

With DSG® dual clutch gearbox.

High-quality interior

Smart interior design and improved interior acoustics.

Always shows its best side

No matter how you look at it, the Caddy Trendline impresses with sharp, precise and dynamic lines, and a whole host of distinctive features.

In particular its new rear with a spoiler, as well as the sportier design at the front, have been perfected. Striking headlight design and clear contouring of the taillights, available with optional tinting, give the vehicle a very special touch of class. Nevertheless, the Caddy Trendline remains true to itself: a superbly versatile and practical vehicle for the whole family.

Shopping for two, summer holidays for five, kids' birthday party for seven: The Caddy takes life as it comes. Reliable, flexible and as versatile as its predecessor, the fourth generation is even more comfortable and economical. This makes it a very special vehicle – and the perfect all-rounder.

Plenty of space to relax

Please take a seat. Inside you will find up to seven extremely comfortable seats and a high-quality finish on the cockpit - with the easy to handle, leather-covered, multi-function steering wheel available on request. Of course, there are also several cup holders and practical storage spaces, for instance in the doors and the central console. In addition, a spacious roof shelf is located directly above the driver and passenger seats, where it is possible to store larger objects.

Up for new challenges every day

The interior with folding, double-folding and removable seats.

Workdays, Sundays, holidays. Every day is different. That is why the seats in the second seating row of the Caddy can be easily folded, double-folded or, if necessary, removed. This creates the space needed for big shopping trips, and transporting small furniture. The low loading sill height and the even load surface make loading and unloading as easy as possible.

The latest standards in safety

To ensure that every adventure ends as stress-free as it begins, the Caddy is equipped with various safety systems, which are activated in critical situations as a preventative measure.

Part of the onboard standard equipment is the Automatic Post-Collision Braking System. Following an accident, the vehicle begins a phased braking action down to 10 km/h in order to prevent secondary collisions. Should an impact nonetheless result, head airbags will provide optimal protection to the driver and passenger.

Electronic Stability Programme

It prevents under- or over-steering via targeted braking of individual wheels.

Anti-lock Braking System (ABS)

Prevents wheel block and, thus, maintains manoeuvrability.

Electronic Differential Lock (EDL)

Distributes the engine's torque to the tyres without slippage.

Automatic Post-collision Braking System™ (MCB)

Triggers braking after a collision, with the aim of preventing secondary collisions. The Automatic Post-Collision Braking System activates when two independent sensors detect an accident. After a short delay, the vehicle begins a phased braking action down to 10 km/h, during which the driver can take over at any time.

Traction Control System (TCS)

Prevents wheelspin.

Seatbelt warning

If their seatbelts are not fastened, the seatbelt warning reminds the driver to fasten their belts with a visual warning when the engine is started, and an acoustic warning after setting off.

Airbags

The Caddy Trendline comes with driver and front passenger airbags as standard, and side/head airbags too.

A relaxing drive every time

Park Distance Control

Emits audible warnings when obstacles are detected behind the vehicle when parking, and also provides a visual display of the vehicle's distance from the obstacles.

"Rear-View" reversing camera (O)

Simplifies parking by showing a limited view of the area behind the vehicle on the display of the radio. Additional static guidelines facilitate the parking process. The reversing camera is only available in combination with the tailgate.

Driver Alert System

Uses visual and acoustic warning signals to recommend that the driver takes a break as soon as it registers driving behaviour that indicates tiredness.

Daytime running lights

Switch on automatically when the ignition is activated and lower the risk of an accident in daylight.

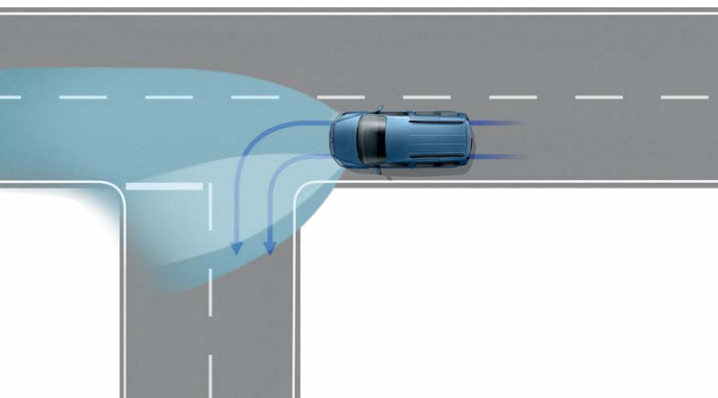

Brake assist system

Registers the speed at which the brake pedal is pressed. During a reflexive or emergency braking action, it ensures that full brake pressure is built up more quickly.

Hill Start Assist

Prevents the vehicle from rolling back on inclines and makes handling easier when starting up on uphill slopes.

Fog lights with integrated static cornering light ☼D

Ensure optimal visibility in poor weather conditions. The headlight nearest to the corner illuminates the roadside when turning.

The innovative optional "Park Assist" programme ☼D

takes all the stress out of parallel parking by automatically sensing parking spots as you drive and then manoeuvring your car into the bay automatically. All you need to do is take your hands off the steering wheel, control the accelerator and brake when necessary.

Pioneering engines

In the Caddy, you will find a generation of engines that captivate with their impressively smooth running and fuel savings.

Power transmission to the front wheels is the task of the smooth-running 5-speed manual gearboxes. Selected engines can also be combined with the DSG® dual clutch gearbox.

DSG® dual clutch gearbox

Thanks to the intelligent gearshift system, the 6-speed gearbox changes fluidly to the next preselected gear at the optimum time. This results in excellent driving comfort without an interruption in

TDI

The TDI engines. The fuel-efficient 2.0 l turbo diesel engines with common rail direct injection are available in two different performance levels. The 103 kW engines can be combined with the dual clutch gearbox DSG®.

2.0 l TDI (81 kW)

Torque (Nm at r/min) : 250 at 1500-2500

2.0 l TDI (103 kW)

Torque (Nm at r/min) : 320 at 1750-2500

Small changes make a big business

How about a little extra?

The Caddy Trendline impresses with its attention to detail. The exterior is enhanced by the colour-coded door mirror housings, door handles and cover plates for the sliding door. Dual sliding doors make getting in and out even easier.

Electric windows

Open or close the window at the push of a button.

Remote-controlled central locking with SAFELOCK

For convenient safety.

Climatic® airconditioning

Stay cool and relaxed on every drive.

Drawers under front seats

For a clutter-free cockpit with easy access to your belongings.

Servotronic® power-steering

For an effortless drive.

Cruise control

Drive longer distances with confidence.

Luggage compartment cover

Keep your precious cargo out of sight and protected from the sun.

Dual sliding doors

Make getting in and out quick and easy.

Seven's company

The Caddy Maxi Trendline has space for anything, for anyone, to go anywhere.

Space to be spontaneous. It is 47 cm longer than the short wheel base version. This is especially noticeable in the rear seats and load compartment of this 7-seater. For the passengers, this means convenient entry and exit through two extra-wide sliding doors, as well as ample head and leg room.

At the same time, the load compartment offers 530 litres of space, so you'll never run short of packing space. The Caddy Maxi also comes with the option of a 6-speed DSG® dual clutch gearbox that changes in perfect time for a smooth and comfortable drive.

Space for everything

For us, flexible was never flexible enough. The Caddy Trendline comes standard as a 5-seater, with an optional 7-seater package, and the Caddy Maxi Trendline comes standard as a 7-seater. The rear seats in the Caddy can be folded, and completely removed – sometimes even independently of each other. The single seats in the second seating row can even be double-folded if necessary. This allows the interior to be adapted whichever way your imagination conjures up – no matter how wild this may be.

2 Seats

As a 2-seater, the Caddy boasts an impressive 3,030 l loading space volume – and even more when the front passenger seat is folded down. Ideal for lots of luggage.

3 Seats

The second row of seats is divided in a ratio of $\frac{2}{3}$ and $\frac{1}{3}$. This provides plenty of individually customisable usage possibilities.

4 Seats

Remove the 3rd seat in the second row of seats for extra packing space.

Infotainment

The Caddy has been designed as a space where drivers will love to spend their time. The latest generation of high-quality radio systems impress with their easy control and good sound.

“Composition Media” radio system

The system consists of a 16.5 cm (6.33 inch) TFT colour display, a touchscreen with proximity sensor, an MP3- and WMA-compatible CD drive, a 4 x 20 Watt output with six loudspeakers, a dual tuner with phase diversity for optimal radio reception, an SD-card slot, an AUX-IN interface, USB interface (iPad, iPod and iPhone capable), and a Bluetooth connection for mobile phones.

Leather-covered multi-function steering wheel

It gives you a good grip and is extremely user-friendly. The radio, a mobile phone or the cruise control can be controlled using the buttons.

“Plus” multi-function display (not illustrated)

In addition to the functions of the multi-function display, it can be used to regulate and to adjust the Light and Sight package.

“Comfort” mobile phone interface

The special compartment for your mobile phone has a wireless external aerial connection to optimise your mobile phone reception. Charging the phone is straightforward too: The cellphone simply has to be connected to the USB interface (iPad, iPod and iPhone capable) which is also located in the compartment.

Mobile phone interface (not illustrated). A wireless Bluetooth interface enables you to make phone calls safely and conveniently during the journey using a microphone and the vehicle loudspeakers. Depending on the equipment, it can be controlled via the “Plus” multi-function display or the touchscreen display of the radio system.

Colours

The illustrations on this page can only be regarded as a general guide as the printing process cannot render the true depth and brilliance of the paint finishes with absolute accuracy. Please note that certain paint and trim combinations may not be available.

Wheels

"Bendigo"

alloy wheel 6J x 16

With 205/55 R 16 tyres

Exterior

Sliding window

With handles for easy operation.

Towbar preparation (not illustrated)

This consists of a trailer detection control unit complete with wiring, and includes trailer stabilisation. A towbar can therefore easily be retrofitted at any time.

Detachable towbar

This lockable towbar can be detached when not in use. This makes manoeuvring easier, especially when parking in small spaces. Like the fixed towbar, it is designed for trailer loads of 660 kg (unbraked) to 1,500 kg (braked), and is also fitted with trailer stabilisation.

Bi-Xenon headlights

The Bi-Xenon headlights produce both high and low beams, and illuminate the roadway significantly better than conventional halogen headlights. They also stand out due to their low energy consumption.

Tinted tail lights

They add a distinctive flair, and lend the new tailgate a bold character. Only available in conjunction with Bi-Xenon headlights.

Tailgate with window

The smooth-functioning tailgate can be opened with one hand. When open, it offers protection from rain and sunshine during loading and unloading. A third brake light is integrated into the spoiler. The tailgate is always equipped with a soft touch opening system.

Rear wing doors with windows

The roof-height rear wing doors are divided in a ratio of $\frac{2}{3}$ to $\frac{1}{3}$, and have a maximum opening angle of 180 degrees. They can be separately fixed in an open position to allow longer goods to be transported, if necessary. Please bear in mind when ordering rear wing doors, the number plate light holder is made of black plastic.

Interior and comfort

Leather trims

The pleasant feel of the leather trim controls add to the vehicle comfort, and raise the interior to a whole new level. The leather trim equipment includes the gear lever knob and the handbrake lever, as well as the gaiter. It can be combined with the leather steering wheel or the standard leather-covered multi-function steering wheel.

***A combination of leather and high quality durable materials.**

12 V socket in compartment, front

A 12 V socket is integrated into the storage compartment on the dash panel, e.g. for mobile phones or notebooks.

12 V plug in central console (not illustrated)

The socket is located in the easily accessible front area of the central console.

12 V socket in load space (not illustrated)

For portable cooler boxes and larger 12 V devices, there is also a socket in the load space.

Climatic® airconditioning

The semi-automatic airconditioning has an infinite adjustment, so that a pleasant interior temperature can be ensured at all times. Thanks to ergonomic buttons and knobs, the temperature in degrees, air distribution, and fan speed can be easily regulated while driving.

Electric windows

The flip switches are comfortably located within easy reach in the armrest on the door interiors, and have a comfort switch with jamming protector. Along with the electric exterior mirrors.

Light and Sight package.

Sensors dim the rear-view mirror automatically when the lights of the vehicle behind are too bright, and regulate the intervals of the windscreen wipers during rain. The automatic driving light control with daytime running lights switches the headlights on automatically when it starts to get dark. The package also features the manual “coming home” and “leaving home” functions.

Soft touch opening system

The tailgate is opened effortlessly using a button on the underside of the number plate light holder.

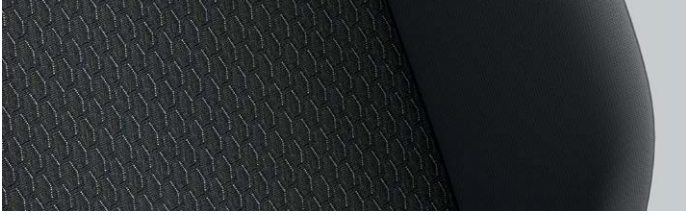

Lashing rings

There are four lashing rings in the load compartment of the Caddy and six in the Caddy Maxi to safely secure loads. If you choose the optional third seating row for the Caddy with the short wheelbase, the number of available lashing rings in the load space is limited to two.
