Why fit Volkswagen Exchange Parts?

Volkswagen Exchange Parts are the cost-effective option to Volkswagen Genuine Parts for older vehicles (5+ years).

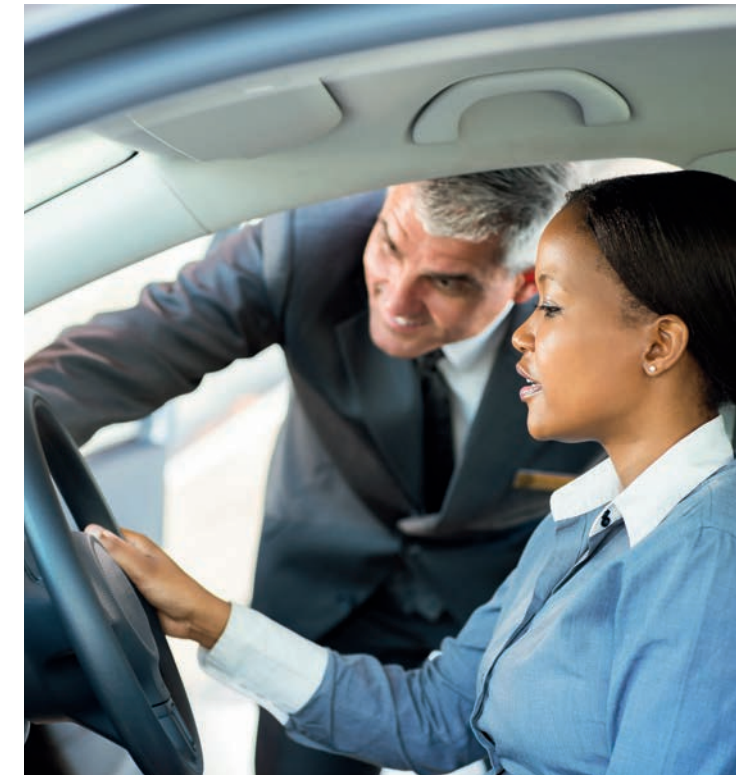

- This product range offers a price advantage and satisfies the same high quality requirements as Genuine Parts – with a 12-month warranty.
- Exchange Parts extend the service life of your vehicle and help maintain the resale value of your Volkswagen.

How does it work?

- If you would like to purchase an Exchange Part and have a like-for-like part to return, the Dealer will accept your core part and perform a brief inspection.
- Once the core is found suitable, the reconditioned Exchange Part is sold to you at a recommended retail price that is lower than what you would have paid for the Genuine Part.
- Your original part is then returned to Volkswagen and follows Volkswagen's re-manufacturing process.
- This part should be fitted in a Volkswagen workshop where you can experience a quality repair service combined with technical expertise. This will also help to maintain the resale value of your vehicle.

If you would like to purchase an Exchange Part and do not have a like-for-like part to return, you are still eligible to purchase an Exchange Part but for a slightly higher cost than if you were to make an exchange.

Dear valued Customer,

When your Volkswagen needs a part repaired and you want to maintain the value of your vehicle, Exchange Parts offer an affordable, more environmentally-conscious solution.

Exchange Parts are parts that have been reconditioned and restored to deliver the same safety and longevity of comparable Genuine Parts. These parts are readily available and suited for a wide range of Volkswagen models.

Fitting your Volkswagen with an Exchange Part gives you all the benefits of a Genuine Part, at a reduced price, with the same 12-month warranty.

More information on Exchange Parts can be found in this brochure.

What is an Exchange Part?

Exchange Parts are parts that were once in previous vehicles and have been remanufactured, purified and quality tested to form part of your Volkswagen.

This remanufacturing process preserves the reusable materials, within the core of the part. In some cases, these parts are rebuilt to a technical specification equal to when it was first introduced.

All Exchange Parts are subjected to the same strict quality requirements as Genuine Parts and therefore offer optimum safety, reliability and performance.
